ETHEREUM ECOSYSTEM GRANT · APPLICATION

The city, *upgraded*.

21 turns a report about a broken bench into paid, verified work: residents report, contractors bid, the street decides, and the receipt stays public on Ethereum.

ASK	TO ARTISTS	FOR CODE
$21,000	70%	$0
6 months, one round	21 fees, paid on time	we build it ourselves

21 MURALS · 9 CITIES · 21 ARTISTS PAID

Cities can see the problem. They can't find the €420.

Every day a report turns into a reference number, and a small repair waits for a season that never comes.

01

Reports end in a ticket.

A photo to a hotline returns a case number, not a budget. Nobody learns who decided, who was paid, or what happened next.

02

Small fixes fall through.

€420 for a bench, €950 for a bike rack: too small for procurement, too visible to ignore. They wait for a season that never comes.

03

Contractors stay invisible.

The people who could fix it never see the job. The city never sees their price. The resident sees nothing at all.

PHOTO: A RESIDENT'S PHONE

TICKET A-1142 · OOSTERPARK · DAY 91

WHAT IS MISSING

A budget. A bid. A name. A receipt.

Not another app. An upgrade for the street corner.

Cities already have crews, budgets and rules. 21 replaces the missing layer between a report and a paid invoice — and makes the result visible.

From tickets to tasks

A report becomes a task with a budget, a deadline and a public URL.

From procurement to bids

Contractors publish itemised quotes. Residents choose under rules fixed before the money arrives.

From repairs to authorship

Every fix is documented, and every wall is painted by a paid artist, with the owner's written consent.

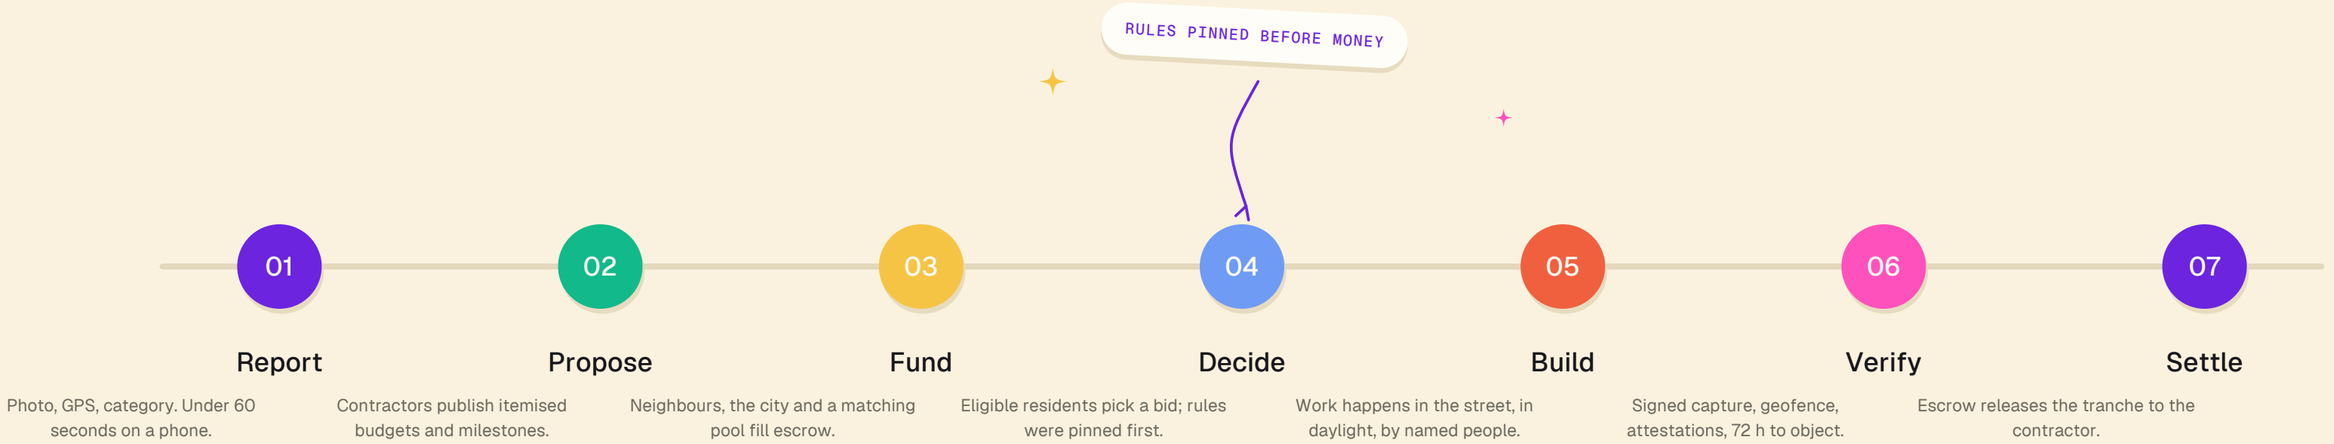

THE UPGRADE IS ADDITIVE

Cities keep their crews, budgets and procurement rules. 21 adds the missing part: a public task record, competitive bids and a receipt anyone can audit.

Seven steps from a photo to a paid invoice.

One continuous workflow. Every step leaves a public artefact: a task, a bid, a vote, a photo, a payment.

PUBLIC BY DEFAULT

- who bid, and for how much
- who voted, and on which rules
- who was paid, and for which milestone

PRIVATE BY DESIGN

- faces and plates blurred on the device
- coarse public coordinates, never your door
- personal data off-chain, deleteable on request

Bids arrive itemised, in public.

A contractor needs a phone and a price list. No tender documents, no 90-day invoice cycle, no relationship with city hall required.

WINNING BID · LINE BY LINE

Groenwerk BV

€412 TOTAL

Oak slats, 6 pcs, FSC	€114
Stainless fixings	€24
Labour, 2 × 4 h	€236
Transport + old-slat disposal	€38
Total, no surprises	**€412**

Every line is editable in the bid form. No lump sums, no allowances.

3 bidders per task

18% price spread

6 h to first bid

24 h to payout after verification

05 — ONE TASK, END TO END

A bench in Oosterpark. Nine days, start to receipt.

Demo scenario from the product spec. Amounts and dates are illustrative, not reported results.

DAY 0 · REPORTED BY A RESIDENT

DAY 9 · FIXED AND ATTESTED

Payments land the day verification clears — not in the next quarter.

TASK LEDGER · PUBLIC BY DEFAULT

Day 0	Task published	€420 target
Day 1	3 bids received	€380 - €455
Day 3	84 residents voted	62% Groenwerk
Day 4	Escrow funded	€420 in USDC
Day 7	Milestone evidence	6 photos + GPS
Day 9	Dual attestation	payment released

WHAT THE RESIDENT KEEPS

A public URL with the full history, the contractor's name and the final payment.

21.city/t/oosterpark-bench

06 — THE KIT

Modern street furniture, priced line by line.

Every task template carries a specification, so three contractors bid on the same object — same material, same life, same repair.

Lijn bench €420

Cast concrete base, FSC oak top

30 yr base · 12 yr top

SPEC SHEET · V21

3 BIDS · 1 WINNER

Lus rack €950

Powder-coated steel loops

20 yr · 6 bikes

SPEC SHEET · V21

3 BIDS · 1 WINNER

Sedum shelter €6,400

Steel + glass, sedum roof, 340 Wp

25 yr · off-grid

SPEC SHEET · V21

3 BIDS · 1 WINNER

ITEM	MATERIAL	DESIGN LIFE	UNIT COST	REPAIR
Lijn bench	Concrete + oak	30 / 12 yr	€420	2 h
Lus rack	Powder-coated steel	20 yr	€950	4 h
Sedum shelter	Steel, glass, sedum, PV	25 yr	€6,400	2 days
Zon light	Solar LED, 5-day autonomy	15 yr	€780	3 h
Rond planter	Recycled concrete	30 yr	€310	1 h

Every spec sheet is a live bid template: three contractors quote line by line, the street picks one, escrow pays on delivery.

07 — VERIFICATION

Proof first. Then money.

A photo alone is not proof. 21 combines signed capture, a geofence, independent attestors and a 72-hour window to object.

01 Signed capture

Photos are taken inside the app. EXIF, GPS, gyroscope and a device signature are hashed and stored with the file.

02 Proximity, not claims

The capture must fall inside the task geofence; anything above €1,000 gets a reviewer visit.

03 Dual attestation

A resident attestor and a city partner sign each milestone. Above €1,000, a random reviewer is added.

04 A real challenge window

72 hours to dispute with a staked bond. Lose and the bond pays the reviewer; win and it comes back.

Escrow is frozen by default: a missed attestation means no payment, not a polite reminder.

21 is a number anyone can paint.

A commissioned, always-authorised mural programme runs alongside the protocol. It is how a civic tool becomes recognisable on a street in Lagos or Lisbon without a translation.

- **Commission, never tag**

  Every wall has a signed owner consent, a removal clause and a paid artist. The registry refuses locations without a permission record.

- **One artist per wall**

  Year one: 21 walls in 9 cities, €300–€1,200 per wall. Each work is a Proof-of-Place entry, so the number and the place stay linked.

- **The number is the message**

  No slogan to translate, no logo to explain. Two digits, painted by hand, pointing back to a working protocol.

21	21	9	100%
walls commissioned	artists paid	cities in 6 months	consented walls

Paid before the paint dries.

No exposure, no revenue share, no waiting for the grant to close. Half on the brief, half on documentation, five days median.

1

Open call

A public call per city, reviewed with a local curator.

€300-1,200 per wall

FEE BAND

2

Owner consent

Signed permission, removal clause, insurance binder.

one page, no lawyer

BEFORE PAINT

3

50% on brief

Half the fee lands when the sketch is approved.

SEPA or USDC

DAY 1

4

Wall painted

Materials, lift and prep covered separately.

producer on site

DAYS 2-5

5

50% + record

Final half on photo documentation and a registry entry.

median 5 days

DAY 6

ARTIST CONTRACT, PLAIN LANGUAGE

- Artist keeps copyright and credit; 21 gets a licence to document.
- Removal clause: the owner can ask for the wall back, paid.
- No wall starts before consent and insurance are on file.

HOW THE MONEY ARRIVES

SEPA in EUR or USDC on Base — the artist chooses.

Median payout: 5 days from approval, not from a funding round.

Escrow is only used for contractor work, never for artist fees.

The receipt should outlive the grant.

A civic platform that moves public money should not be able to rewrite its own history. Ethereum gives 21 four properties no SaaS can offer.

Neutral settlement

No company sits between a resident's euro and a contractor's invoice. The escrow is the counterparty.

A global payment rail

USDC on Base pays a contractor in Nairobi or Nijmegen in seconds, without a bank account.

Composable public goods

Quadratic funding, retro funding, EAS attestations and Safe treasuries plug in unchanged.

A permanent public record

What was promised, funded and delivered stays queryable — even if 21 the company disappears.

WHAT 21 DELIBERATELY DOES NOT DO

- × No token sale and no speculative asset
- × No custody of user funds at any point
- × No paid placement of projects or contractors
- × No growth metric that is not on-chain verifiable

WHAT ACTUALLY GOES ON-CHAIN

`who was selected · what was promised · what was paid`

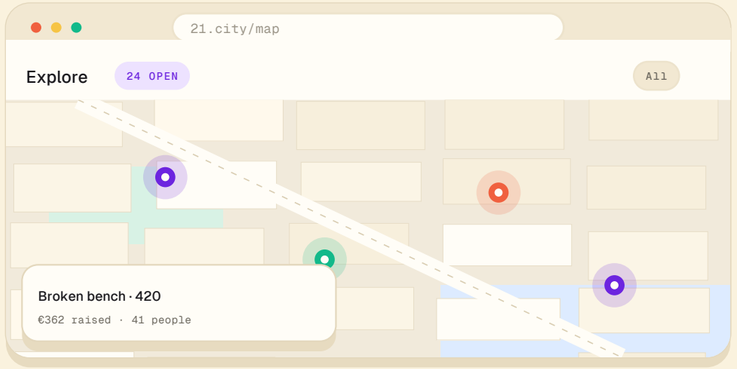

Not on-chain: faces, plates, addresses, phone numbers.

Media stays content-addressed off-chain; the hash is forever.

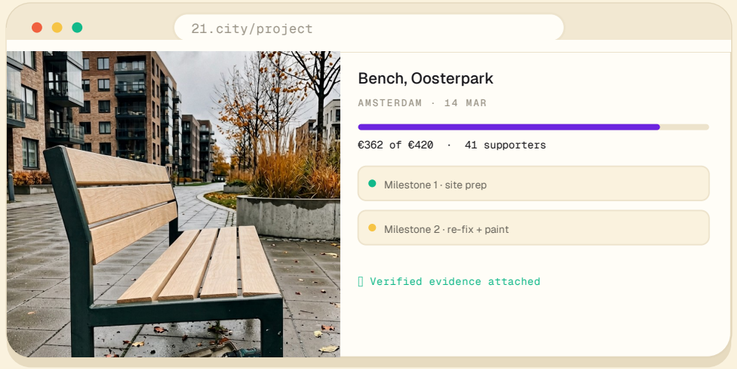

Six screens, one continuous workflow.

Responsive web app plus an installable mobile PWA. Every screen below is MVP scope, not a future release.

PHOTO FIRST, FORM LATER

01 **Explore** Map-first discovery with live tasks

02 **Project** Evidence, budget, milestones, discussion

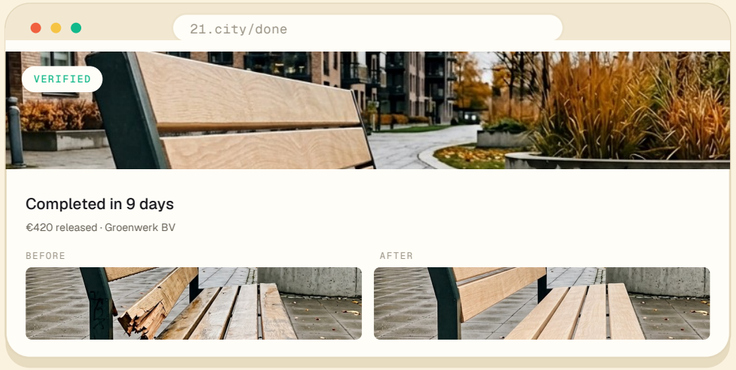

03 **Report** Photo, GPS, category — under 60 seconds

04 **Bids** Competing quotes with itemised budgets

05 **Contractor** Bids, contracts, evidence, payouts

06 **Completed** Before / after and the payment record

Friendly on purpose.

Civic software usually looks like a form. Ours looks like something a neighbour would send you: warm paper, big targets, one clear action.

€362 of €420

ONE BIG BUTTON

Why the ask is $21,000.

We are not asking anyone to pay for code. The team writes it. The one thing we cannot do ourselves is pay artists on time.

CREW PAID IN 5 DAYS · AMSTERDAM

$21,000

over 6 months

21 artists · 21 walls · 9 cities

CODE: $0

THE MONEY GOES TO PEOPLE

70% of the ask goes straight to artists. Nothing is spent on marketing, tokens or exchange listings.

LINE ITEM	SHARE	USD
Artist fees, 21 walls × $700 avg	70%	$14,700
Paint, wall prep, lift or scaffold	10%	$2,100
Local photographer + short film	10%	$2,100
Consent, permits, insurance	5%	$1,050
Open call + paid curator	5%	$1,050

If the grant is smaller, we paint fewer walls — not cheaper ones.

$21,000 total

Five payments, each tied to walls that exist.

No milestone is closed on a slide. Each one ships something a reviewer can visit, photograph or open.

PAID WHEN IT EXISTS

MILESTONE	ACCEPTANCE CRITERION	SHARE	RELEASE
M1 Month 1 — Open call + 21 contracts	21 signed artist contracts, 9 owner-consent letters, curator engaged	10%	$2,100
M2 Months 2-3 — First 7 walls, 3 cities	7 walls installed, photographed and registered with proof-of-place	30%	$6,300
M3 Months 3-4 — Walls 8–14 + documentation	7 more walls, plus a photo and short-film package per city	25%	$5,250
M4 Months 4-5 — Walls 15–21, 9 cities	All 21 walls installed and registered; 21 artists paid in full	25%	$5,250
M5 Month 6 — Exhibition + open kit	21 walls shown publicly; the artist kit published under MIT	10%	$2,100

CUMULATIVE RELEASE

An unmet criterion means an unpaid milestone, not a renegotiation.

Three people, one curator, 21 artists.

Small by design. Most of the money leaves the building on day one of each wall, on its way to the person holding the brush.

P

Protocol & product

contracts · app · escrow

Solidity and Foundry, civic interfaces, PWA capture. Owns the escrow, the registry and the public task page.

[name] · [github] full time · 6 months

P

Programme lead

cities · artists · permissions

Runs the open calls, the consent paperwork and the wall calendar with the local curator in each city.

[name] · [linkedin] full time · 6 months

F

Field producer

build · lift · documentation

Books the lift, the paint and the photographer; makes sure every wall finishes on the day it was promised.

[name] · [linkedin] full time · 6 months

CURATOR · PAID, ONE PER CITY

Local curator, selected with the city

They shortlist artists, sit on the open call and write the wall notes. Paid from the budget line, never asked to work for visibility.

THE 21 ARTISTS

Paid per wall, credited by name

No equity. No tokens. No exposure.

Fee range €300–€1,200, always published.

OPEN ROLE, FUNDED BY TRANCHE 2

Verification & field-operations lead — runs reviewer panels in the pilot cities.

NOT APPLYING FOR

Marketing budget, token liquidity, or exchange listings.

16 — SUCCESS METRICS

Targets, not traction.

21 is pre-launch. These are the numbers we commit to publishing at close-out, with the raw registry export next to them.

RECEIPTS, NOT VIBES

GUARDRAILS — WE FAIL IF THESE MOVE THE WRONG WAY

0, ever	< 7 days	< 1% of released value	< 8% of tasks
Unauthorised walls	Artist payment median	Fraud rate	Disputes

Every number is a target for month six, not a result. The methodology ships with the report.

17 — RISKS

What could go wrong, and what we do about it.

A mural programme and a payment protocol have different failure modes. Both are written down before the first euro moves.

THREAT	WHY IT IS REAL	MITIGATION IN THE MVP
Artist pulls out	A wall is booked, a fee is committed, the artist disappears.	Signed contract before the open call closes; a named backup artist per city; the fee is escrowed in two tranches.
Owner revokes permission	Buildings change hands; a new owner wants a plain wall.	Removal clause signed up front; the registry marks the wall retired; the documentation stays public.
Weather and access	Rain, scaffolding permits and festival weeks move the calendar.	Two-week buffer per city; indoor walls in the mix; the lift is booked only after consent.
Fabricated evidence	A model can draw a fixed bench in seconds.	In-app capture only, signed metadata, C2PA credentials, perceptual-hash dedupe, human spot audits.
GPS spoofing	Mock locations are one developer setting away.	Geofence plus cell/Wi-Fi corroboration; a reviewer visits anything above €1,000.
Escrow bug	Contracts hold real money from day one.	Two audits before mainnet, invariant fuzzing, per-task caps, 3-of-5 guardian pause with 48 h delay.

Open question we bring to reviewers: what is the minimum viable proof for a €300 repair that still resists a determined faker?

Built to outlive the round.

The artist kit and the protocol are open source. Revenue, if any, is optional and capped; the public instance stays free for residents.

01 Sustainable by design

- Optional 1.5% fee on released escrow, capped and opt-in per city
- Hosted instance + support subscription for municipalities
- Matching pools funded by partners, not by the protocol

02 Progressive, slowly

- M1–M5: core team ships, guardian multisig holds pause rights
- Year 1: a council elected by contributors, parameters on-chain
- Year 2: registry ownership renounced; fee switch under token-less vote

03 What stays open

- Contracts, indexer and client under MIT
- The artist kit: call template, contract, consent form, spec sheets
- A public export of every task, attestation and payment

IF THE PILOT WORKS, THE NEXT EIGHTEEN MONTHS LOOK LIKE

21 cities

the full campaign, one wall in each city

200 walls

recurring artist commissions, not one-off demos

€1m escrow

mostly partner-funded matching pools

1 kit

any civic group can run their own edition

The registry stays public, the artist kit stays MIT, and the first 21 walls decide whether this is real.

21

THE ASK

Let's paint *21*

$21,000 over six months to pay 21 artists, install 21 walls in 9 cities, and leave behind an open kit any city can copy.

21.city

hello@21.city · github.com/horaanlika-droid/21movement-

Open source · MIT · no token

Thank you. Bring a wall.
